

UK Corporation Tax Gap Dashboard

Exploring which sectors and taxpayer types carry the greatest compliance risk.

What do these terms mean? (click to expand)

- ① Which sectors owe the most tax?
- ② Is the tax gap growing over time?
- ③ Who is responsible for the gap?

Who is responsible for the tax gap?

HMRC divides taxpayers into groups by size. This chart shows how much of the tax gap each group accounts for, and how that has changed since 2019. Small businesses typically make up the largest share — not because they're dishonest, but because there are so many of them and they have less support to get their tax right.

Select groups to compare:

- ☒ Individual customers
- ☒ Large businesses
- ☒ Mid-sized businesses (charities and public bodies)
- ☒ Small businesses
- ☒ Wealthy individuals

Show:

- ☒ Tax gap in £ billions
- ☐ Tax gap as % of what should be paid

Tax Gap by Taxpayer Group — Tax Gap (£bn)

How efficient is HMRC at recovering tax from each group? (2023–24)

This compares HMRC's performance across groups for the most recent year. Use the dropdown to switch between different measures of efficiency.

% of missing tax that HMRC recovered
